

The Power of Adaptogens

The super adaptogens and functional antioxidants found in **RhodiGandha** are far more superior than any other substance on earth for your health. Let's explore what makes these particular adaptogens and antioxidants different and what we did to make them even better.

Out of over 300,000 of herbs and botanicals there are a few that are considered kings of them all and they are called adaptogens. Only a dozen herbs have been scientifically certified as primary adaptogens out of over a quarter of a million other herbs and botanicals. And out of these few isolated group are even fewer that were considered in a class by themselves.

These botanicals when first discovered were thought to be so amazing that the world's top scientists decided to study them in secret spending over 2.5 billion dollars in research over a 30 year period. It was discovered that a couple of adaptogens to be far more superior than anything else whether it be a vitamin, mineral, fruit, berry and even more effective than any synthetic man made chemicals like drugs or biotechnology. These adaptogens demonstrate their unique energizing, restorative, anti-aging and brain-improving powers beyond anything else that has ever been discovered. Over time these secrets started to leak out into the West in the late '90s and only now the power of these adaptogens have come to full light.

*There is not an antioxidant, vitamin, mineral, fruit, berry, juice, or pharmaceutical drug that delivers the powerful health benefits found in the adaptogens in **RhodiGandha**. PERIOD!*

Decades of Research, Centuries of Use

Rhodiola Rosea — Over 400 years of secret clinical trials done in Russia. It has shown to be useful in combating emotional and physical adeptness and endurance in all age groups of men and women. It reduced fatigue due to its potential effects on supporting serotonin and dopamine in the body which helps with mood and depression along with cravings for specific foods. It has been used in the Russian space & Olympian programs.

Ashwagandha—Used as an herbal remedy for hundreds of years in the far east especially and in native America. It helps with the inflammatory response, fevers and to protect against infection and illness. It has been shown beneficial to adapt to stress, support a healthy immune system and better mental focus. It has been proven to help with stamina and endurance.

Acai Berry— Found in the Amazon and it is a very powerful anti-oxidant. It is full of omega fats, amino acids, electrolytes, Vitamins A, B and E. Only recently it came on the market here in our Western culture, in 2000 but the research goes back hundreds of years.

Caucasian Bilberry— Probably best known for treating conditions of the eyes. In clinical studies, it has been shown to decrease some of the retinal damage caused by diabetes and high blood pressure. It increases collagen linkages and helps to make the walls of the blood vessels in the eyes stronger, thus reducing the beginning process of macular degeneration and related conditions.

Blueberry Leaf— Also an aid for diabetics. It helps combat some stressors that affects the pancreas, kidneys and gallbladder. It has shown reduction in inflammation in gastric colitis, diabetes and digestive troubles. Some studies were showing it to block the replication of the Hepatitis C virus which has been one of the causative agents in cirrhosis and fatty liver disease. Its effect on viruses is very promising. The blueberry leaf has also been associated with reducing the effects of age related degeneration such as memory challenges and loss of physical coordination.

Georgian Pomegranate— A native plant of North Africa and the Caucasian Mountains. It has also been used in folk medicine to promote longevity and vitality. It alone is packed with antioxidants which prevents cancer, heart disease and macular degeneration. The juice extract blocks enzymes that cause the symptoms of osteoarthritis - which is coming from results seen in Case Western Reserve School of medicine in Cleveland.
